FULL STACK SOFTWARE ENGINEER

Full Stack Software Engineer experienced in Python with Flask and JavaScript based programming and over 10 years of experience in Insurance and Risk Assessment.

LANGUAGES / FRAMEWORKS

JavaScript, React, Vite, Three.js, Python with Flask, SQL, HTML, CSS

TECHNICAL PROJECTS

SPOTT'R - [Github](#) | [Demo](#)
Weather Dashboard & Storm Tracker App
- Implemented drag-n'-drop functionality using React DnD, leveraging its hooks and state management for seamless interaction.
- Integrated secure authentication and user registration, with data stored in a backend database using Flask.
- Leveraged React (Vite) for building dynamic user interfaces and Axios for fetching data from over 50 API endpoints, all of which is visualized on the user's dashboard.

TeamSync - [Github](#) | [Demo](#)
All-in-One Sports Team Management Suite
- Implemented a variety of reusable React components such as calendars, tables, video players etc. using React component libraries including ReSuite and Shadcn/ui.
- Developed extensive sport-specific data visualizations with diverse charts and graphs using ApexCharts and Mapbox, powered by a backend API.
- Created a YouTube clone in JSX and vanilla CSS, enabling users to add gameplay footage and highlights.

UFC Database - [Github](#) | [Demo](#)
UFC Data Visualization and Lookup Utility
- Incorporated robust authentication and user creation, stored in back end database via Flask.
- Engineered a direct copy of the UFC website, incorporating its database and key functionalities.
- Leveraged extensive fighter and event data for over 4,000 fighters using Python with Flask back end.
- Implemented user-friendly map, visualizing over 250 separate UFC events along with granular data for each event.
